

Victims of bullying are reluctant to seek help, making cyberbullying hard to detect.

---

### **We bring cyberbullying to light**

Securus monitors your school's computers and alerts you when threatening language is used.

Whether a bully sends a message or a victim receives it, Securus identifies who was involved and captures the evidence.

Even if the incident goes unreported by the victim, staff can still take action.

For more on how to prevent cyberbullying, visit [www.securus-software.com](http://www.securus-software.com) or call us on 01932 255 480

**School cyberbully or victim,  
how can you tell?**
